

Setting Up Droid X phones

Setting up IMAP Email Account in Droid

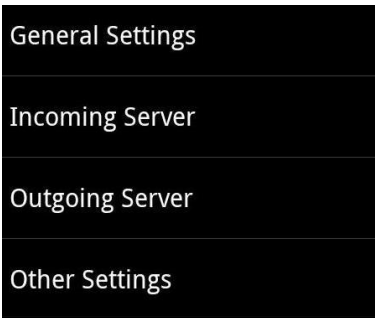

1. From the home screen, open the “Applications Tray” and then choose “Settings”. Once in “Settings” choose “Accounts”. Choose “Add Account.”

2. Choose “Email” on the next screen.

3. Enter your safeaccess email address and password, then be sure to **uncheck** “Automatically configure account.”

4. Click on “General Settings” and input the appropriate information in the fields.
5. Click on “Incoming Server”
Select IMAP
6. IMAP Server name = secure.emailsrvr.com
Set port number to 993
Set username to your full email address
Check the box “Use secure connection”
Tap on “OK”
7. Select Outgoing Server. Set the following settings;
SMTP Server: secure.emailsrvr.com
Port: 465

Username: Full email address

Check the box “Use secure connection”

Tap on “OK”

8. Select “Other Settings”

Here you can choose how many messages on the server you want to see.

Tap on “OK”

9. Tap on “OK” again to submit your email setup.

10. Your account is now setup on your Droid X. Please test sending and receiving to make sure it is working.
